Francesco Di Santo

Date of birth: 19/04/2001 | **Place of birth:** Atessa (CH), Italy | **Nationality:** Italian |

Phone number: (+39) 3774628015 (Mobile) | **Email address:** francescodisanto14@gmail.com |

Website: https://github.com/Frads01 | **LinkedIn:**

https://www.linkedin.com/in/francesco-di-santo-1b6ab7261/ |

Address: Via Carmelo Borg Pisani, 7, 10141, Torino, Italy (Home)

ABOUT ME

Computer Engineering graduate specializing in Computer Graphics and Multimedia. Solid experience in Extended Reality (XR), 3D Modeling and Animation, and Human-Computer Interaction (HCI). Expertise in developing immersive applications and intelligent systems using Computer Vision and Machine Learning techniques. Experience in Unity, Blender, C#, and Python, with a proactive and solution-oriented mindset.

EDUCATION AND TRAINING

31/08/2023 – CURRENT Torino, Italy

MASTER'S DEGREE IN COMPUTER ENGINEERING Politecnico di Torino

- 3D image synthesis and rendering pipelines (C++, OpenGL)
- Digital motion techniques and physical simulation (Blender)
- Analysis and extraction of information from images/videos (Python, OpenCV)
- Development of interactive 3D immersive environments (Unity 3D, C#)
- Interface design, prototyping, and usability
- Machine learning applied to computer vision and multimedia

Website https://www.polito.it/ | **Field of study** Graphics and Multimedia | **Level in EQF** EQF level 7 | **Type of credits** CFU |

Number of credits 120 |

Thesis Cognitive state assessment in extended reality environments using active and passive brain-computer interfaces

09/2020 – 09/2023 Torino, Italy

BACHELOR'S DEGREE IN COMPUTER ENGINEERING Politecnico di Torino

- Coding basics, data structures, and object-oriented programming (C, Java).
- Hardware, assembly language, operating systems, and computer networks.
- Database design and web application development (SQL, HTML/CSS/JS).
- Logic/analog circuits, signals, and fundamentals of automatic control.
- Mathematical analysis, physics, statistics, and linear algebra.

Website https://www.polito.it/ | **Field of study** Information and Communication Technologies | **Final grade** 102/110 |

Level in EQF EQF level 6 | **Type of credits** CFU | **Number of credits** 182

09/2015 – 06/2020 Atessa (CH), Italy

SCIENTIFIC HIGH SCHOOL DIPLOMA Istituto Omnicomprensivo Statale "Ciampoli-Spaventa"

Address Via della Stazione, 9, 66041, Atessa (CH), Italy | **Website** https://www.omnicomprensivoatessa.it/ |

Field of study Applied sciences option | **Final grade** 100L/100 | **Level in EQF** EQF level 4

WORK EXPERIENCE

STUDENT COLLABORATION – POLITECNICO DI TORINO – 03/2025 – 09/2025 – TORINO, ITALY

Support activities for the organization of graduation ceremonies: reception/information desk/material preparation at the Engineering Careers Office.

CURRICULAR INTERNSHIP – EVOHUNT S.R.L. – 04/2023 – 08/2023 – TORINO, ITALY

Business or Sector: Information and communication | **Website:** https://evohunt.com/

Development of part of the code for the new version of the HR Tech front-end software, with the aim of ensuring the acquisition of new skills and understanding of the logic behind the construction and management of an IT project.

WORK-STUDY PROGRAM (PCTO) – FONDO AMBIENTE ITALIANO – 03/2018 – ATESSA (CH), ITALY

Cultural guide and management of tourist flows for the enhancement of local historical heritage, with detailed illustrations of exclusive sites.

SKILLS

computer technology | human-computer interaction | algorithms | multimedia systems | mathematics | computer graphics | virtual reality | augmented reality | computer vision

Soft skills

attend to detail | think creatively | logic | troubleshoot | adapt to change | Operational autonomy and ability to work in a team | manage personal progression

Software e linguaggi di programmazione

Python (computer programming) | GIMP (graphics editor software) | Unity (digital game creation systems) | graphics editor software | C#

CERTIFICATIONS

IDCERT, 05/04/2025

DigComp 2.2 Highly Specialized 8

Mode of learning: Online

Link https://it.idcert.io/idfy/LUZQXC1NNE

Cambridge Assessment English, 11/07/2018

Cambridge English Level 1 Certificate in ESOL International (First) - Score 166

Mode of learning: Presential

LANGUAGE SKILLS

Mother tongue(s): **ITALIANO**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction	
ENGLISH	B2	B2	B2	B2	B2

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

PROJECTS

11/2023 – 06/2024

Computer Graphics: Interactive 3D Web Rendering

Development of an interactive 3D application using OpenGL and custom-modeled Blender environments to simulate real-time visual computing. Key implementations include full camera navigation, dynamic lighting models, custom shaders, and scene graph architecture for seamless rendering.

Technologies: OpenGL, C++, Blender, Visual Studio

Link https://github.com/SalvatoreGiugliano98/Computer-Graphics

05/2024 – 07/2024
Computer Animation Project

Creation of a stylized 3D character animation recreating a dynamic sequence from a TV commercial. The project features custom inverse kinematics (IK) rigging for precise foot placement, natural weight transfer with reactive secondary motion, and atmospheric lighting.

Technologies: Blender, Mixamo

Link https://www.youtube.com/watch?v=uH2S92eg6BA

06/2024 – 10/2024
Canoa Slalom

Development of a computer vision system in Python (OpenCV) to analyze Canoe Slalom race videos in real time. The software automatically tracks athlete and boat trajectories, detects course gates despite water glare and camera motion, and evaluates penalties like touches or missed gates for sports performance analysis.

Technologies: Python, OpenCV

Link https://github.com/Frads01/ipcv-canoa

10/2024 – 01/2025
Multi-platform Screen-casting

Development of a cross-platform desktop application (Windows, macOS, Linux) for real-time screen sharing over local networks using IPv4 multicast. The system features an interactive graphical interface enabling selective screen streaming, live drawing tools, dynamic monitor handling, and automated session recording on receiving devices.

Technologies: Rust, egui, FFmpeg, IPv4 Multicast

Link https://github.com/Frads01/pds-screencast

10/2024 – 02/2025
My Museum Adventure

Development of an Android application designed to gamify museum visits through interactive, story-driven scavenger hunts. Key features include camera-based artwork recognition for riddle validation, interactive indoor navigation maps, multilingual audio guides, and full offline support.

Technologies: Kotlin, Jetpack Compose, CameraX

Link https://github.com/SalvatoreGiugliano98/my-museum-adventure-main

11/2024 – 02/2025
DriveAcademyVR

Development of an immersive virtual reality driving simulator for Meta Quest 3, offering a safe environment to practice driving and learn traffic regulations. The application features a fully interactive vehicle interior with manual controls, realistic driving physics, a dynamic city environment with pedestrian and car traffic, and real-time guidance with sensory feedback for driving infractions.

Technologies*:* Unity, C#, Meta XR SDK (Meta Quest 3)

Links https://frads01.itch.io/drive-academy | https://github.com/SalvatoreGiugliano98/DriveAcademyVR

05/2025 – 07/2025
Face Verification: Geometric Landmarks vs Neural Embeddings

Development of an iOS application designed to evaluate and compare two facial verification technologies: a 3D depth-sensing approach and an AI-based 2D image recognition model. The system features real-time face tracking, simultaneous dual-method testing, and automated performance logging.

Technologies*:* Unity, C#, AR Foundation, ARKit, ArcFace (Barracuda)

Link https://github.com/SalvatoreGiugliano98/FaceVerification

03/2025 – 09/2025

Song Noise Reduction Without Clean Training Data

Development of a deep learning audio denoising system designed to clean music tracks without requiring clean reference recordings. The network trains directly on paired noisy audio samples to remove environmental and background sounds while preserving musical quality and complex audio phase details.

Technologies: Python, PyTorch, Google Colab, Kaggle

Link https://github.com/Frads01/mlvm-noise-remover
